EXPERIENCE

- Volvo Cars**
 - Product Manager, Data Platform*
 - Explored GenAI use cases for car image enhancement, securing stakeholder buy-in from 3 departments for pilot adoption.
 - Owned end-to-end strategy for car asset visualization platforms, conducting 50+ user interviews to define the platform roadmap.
 - Pioneered an LLM Chatbot (OpenAI+ RAG), automating 70% of contract processes for 600+ buyers, saving 6,800+ hours annually.
 - Launched fleet shopping and tracking features across 9 markets (incl. U.S.), growing leads 18% and \$2M+ in pipeline.
 - Designed Data Contract tools, cutting analytics validation time 15% and enabling real-time governance for 50+ teams.
 - Delivered shareouts on LangChain and prompt engineering to a 15-person core data science team, driving experimentation cycles.

Gothenburg, Sweden
Aug 2023 - Present
- SAP**
 - Product Specialist, Cloud Platform*
 - Led a cloud integration system for EDIFACT trade, improving processing accuracy 38% and accelerating \$50M+ in transactions.
 - Orchestrated 3 global teams to prioritize features, slashing deployment timelines by 25% and enhancing system uptime to 99.9%.
 - Organized a 100+ participant hackathon, securing 2 pilots adopted by SAP's innovation lab, yielding \$20k in funding for prototypes.
 - Founded a mentorship program for 50+ women in tech, coached mentees on cloud and automation best practices.

Shanghai, China
Feb 2022 - Aug 2022
- Airwallex**
 - Product Manager Intern, Global Transfer Payment Network*
 - Redesigned batch processing workflows in 3 months, boosting transaction capacity 20% and supporting \$10M+ in monthly volume.
 - Spearheaded SWIFT payment launch across 17 countries, growing transaction volume 12%, adapting to shifting compliance needs.
 - Aligned compliance and operations teams for API updates, reducing settlement errors by 30% for 5,000+ transactions monthly.

Shanghai, China
Nov 2021 - Feb 2022
- Alibaba Group**
 - Software Engineer Intern, Last-mile Delivery*
 - Optimized last-mile delivery algorithms using Python and Scikit-Learn, reducing routing errors by 15% for 10k+ daily packages.
 - Collaborated with engineers to integrate real-time tracking APIs, improving delivery accuracy by 12% for 3 regional warehouses.
 - Contributed to sprint planning and code reviews, accelerating deployment cycles by 10% for a team of 8 engineers.

Hangzhou, China
Jul 2021 - Nov 2021
- Atkins**
 - Engineer I → Engineer II, Bridge Analysis*
 - Developed interactive visualization tools for National Bridge Inventory of 8k+ bridges inspected annually, cutting analysis time 43%.
 - Improved client reporting satisfaction 30% by real-time insights, adopted by major accounts including State Maintenance Program.
 - Led share-outs garnering 2,000+ views and sparking a 25% uptick in tool adoption and driving 350+ downloads firm-wide.

Atlanta, GA
Jan 2019 - Jun 2021, Aug 2022 - Jul 2023

EDUCATION

- Georgia Institute of Technology**
 - M.Sc. in Computer Science, GPA: 3.8/4.0*
 - Teaching Assistant, Data Visualization Lab @Georgia Tech Library
 - Final Year Project: Developed a big data and machine learning system for landscape detection and early warning.

Atlanta, GA
- Hong Kong University of Science and Technology**
 - B.Eng. in Computer Science & Engineering, Honors*
 - Sole engineering admit from Guizhou Province; First in major to win President's Cup for Innovation.
 - Final Year Project: Developed a big data and machine learning system for landscape detection and early warning.

Hong Kong

PROJECTS

- Art Venture**
 - Founder*
 - Launched a boutique art business generating \$15K in total revenue through custom art sales and B2B commissions.
 - Secured collaborations with local breweries and media firms. Managed end-to-end operations in cross-border contexts (U.S. & China).
- iOS Apps**
 - Product Designer & Developer*
 - Designed and launched two niche iOS apps (Zoner & AkaTask) addressing sleep tracking and family task management.
 - Prioritized intuitive UX and frictionless onboarding, earning positive user feedback and 5-star ratings.
 - Developed in Swift with integrated analytics, A/B testing and gained hands-on experience across product lifecycle

TOOLS & CERTIFICATIONS

- Tools: Jira, Python, MySQL, PostgreSQL, PowerBI, Azure AI Services, Kubeflow, RESTful, Kafka, RAG, LangChain, Figma, React
- Certifications: AWIT PM (2024), IIBA PM (2023), GenAI Solutions with Azure (2023), SAP Cloud Platform (2022)
